Dulux Trade

DULUX TRADE HEAVY DUTY THINNERS

M386-0818

PRODUCT BENEFITS

- High solvency thinner for most Epoxy, Vinyl, Chlorinated Rubber and other “heavy duty” paints
- Contains aromatic, alcoholic, ketone and propyl glycol solvents
- Carefully blended to ensure compatibility with most types of “Heavy Duty Coating”
- Complies with customs and other legislation.

USES

- Recommended as a thinner or reducer for most heavy duty paints, both for spray, dip and other application methods.
- Useful as a wash-up solvent for Epoxy based, as well as most heavy duty paints.

GENERAL DATA

Type	Blend of Aromatic and Oxygenated Solvents
Typical usage level	5 – 10% by volume into Hichem Enamel for Spraying
Solids by Volume	0%
Solids by Mass	0%

APPLICATION

Add 250 – 500mℓ of Heavy Duty Thinner to 5ℓ of Hichem Enamel for conventional spray application

PRECAUTIONS

For detailed safety information refer to Material Safety Data Sheet M386-0816

Not suitable for THINNING of Polyurethane paints, although it can be used as a wash-up solvent.

FLASH POINT

20°C.
